RANDEL JHON SERAFICA

Full-Stack Developer

randelserafica1505@gmail.com | +63 956 762 0063 | Cauayan City, Isabela, Philippines
Portfolio: del-portfolio-two.vercel.app | linkedin.com/in/randel-serafica | github.com/Dell015

SUMMARY

Computer Science student (BS CS, 2027) and full-stack developer. Completed a 240-hour internship contributing to an internal ERP system. Leads a five-person team building Karela, a gamified mobile app. Works in Python, C#, TypeScript, Dart, and SQL.

EXPERIENCE

Full Stack Developer Intern | Kyrios Solutions Inc. | Makati City, Metro Manila
Jun 15 - Jul 24, 2026 | 240 hours

- Contributed as a full-stack developer on a team building an internal ERP system for the whole company.
- Worked on ERP modules covering taxation, logistics, database, and company document handling.
- Specific details are withheld under a signed non-disclosure agreement.

PROJECTS

Karela - Gamified Mobile App | Team Lead, 5-member team
React Native (Expo), TypeScript, Supabase, PostgreSQL/PostGIS, SQLite, Gemini API
Landing page and demo: karela-phi.vercel.app

- Lead a team of five building a hybrid fitness and civic-reporting mobile app. Core features are built; app store release is pending.
- Backend on Supabase: PostgreSQL with PostGIS, row-level security, realtime updates, and 15 SQL migrations. SQLite for offline run storage.
- Includes GPS tracking with Kalman-filter noise reduction, adaptive ghost pacing, an AI coach using the Gemini API, squads, guilds, and a territory map.

Personal Portfolio | Solo project
Next.js, React, TypeScript, Three.js (React Three Fiber), Framer Motion, Tailwind CSS
Live: del-portfolio-two.vercel.app

- Designed and built two versions of the site: a scroll-driven 3D experience (particle portrait, black hole, and an explorable solar system of projects) and a lightweight Quick Look page.
- Kept the 3D scene smooth by moving particle animation into GPU shaders and profiling frame cost in the browser.

EDUCATION

Bachelor of Science in Computer Science | University of Saint Louis Tuguegarao
2023 - 2027 (expected graduation)

- Thesis: Karela: A Gamified Mobile Application for Adherence and Urban Stewardship through Effort-Decay Modeling and Crowd-Based Sensing.
- Dean's Lister every semester since first year. High Honors from first-year second semester through second-year first semester; Highest Honors since.

ACHIEVEMENTS

- Regional Finalist, Philippine Startup Challenge 10 (2025), organized by DICT Region II.
- 1st Runner-Up, IgnITE Start-Up Competition (2025), organized by University of Saint Louis Tuguegarao.

TRAININGS

- TCON 8 Cybersecurity Conference, HackthenorthPH (participant).
- AWS Cloud Networking and EC2 Workshop, facilitated by AWS User Group Philippines leaders (participant).

SKILLS

Languages: Python, C#, TypeScript, Dart, SQL
Frameworks and platforms: React, React Native (Expo), Next.js, Three.js, Flutter, Supabase
Tools: Git, GitHub, Figma
Workflow: AI-assisted development using Supabase and Figma MCP integrations
Exposure: AWS (EC2), cloud networking
